

## ROSE F. KENNEDY GREENWAY

### **Boston, MA**

As part of the beginning of landscape maintenance phase for the Rose F. Kennedy Greenway, it was decided that topdressing turfgrass with compost would be a key component of an organic lawn care program. Agresource's All Natural Compost was chosen due to the organic matter content and high level of nutrients that it provides. Regular aeration, topdressing, and over-seeding will continue to be a part of the organic lawn maintenance program. Root zone properties will be monitored annually.
